

## Sage Accounting and Payroll software

### Blenheim Consulting Ltd

We are a Sage Accountant Partner providing Sage software support, accountancy, bookkeeping and business support to a variety of enterprises both large and small.

Whether you are just starting out in business or have been trading for a number of years, we are confident that we can provide solutions that satisfy your needs and give you value for money.

With the advances in technology and leading financial software provided by Sage we are confident that we have the knowledge and tools to assist you in growing and developing your business.

#### Sage software implementation and support

Choosing the right financial software for your business can be a daunting task, but it is one that is important to get right first time. Before making any recommendation to you we will want to get to know your business—what is important to you and what do you need to run your business—so that we can advise you on which product is right for you.

As a Sage Accountant Partner we can supply, install and configure the software and provide hands on, one to one training to make sure that you and your business can get the most out of your investment.

By choosing Sage software you can be sure that you will get an accounting solution that meets all your needs. Sage is recommended by over 90% of accountants and is the perfect solution for businesses requiring a powerful accounting system which will accommodate any of your business requirements no matter how complex.

#### Sage report and document design

Are you struggling to get information out of your Sage financial systems? Are you looking for customised professional looking documents that you will be proud to send to your customers?

If the answer is yes to either question then let us help you release the information! We can design bespoke reports and documents for you to use with your existing Sage software.

#### Sage 'Help Sheets'

Do you carry out processes so infrequently that you can never remember the procedure or do you have key processes that many staff carry out that you want to make sure everyone is processing in the same way? If you do, we can provide simple to use, laminated guides that walk you through the relevant processes in a step by step manner using screen images to help you and your team to fully understand the process.

To obtain a quote for assisting you with your Sage software requirements, please either write to us at the address below, email us or call us on
